A Description of the Foure Quarters of the Yeere, and first of Winter.

⊙ in ♑, ♒, ♓.

According to the custome of Writers in this kinde, Winter Quarter is the first Quarter, which tooke beginning the 12. day of December, 1636. at what time the Sunne entred into the first degree of the cold and dry signe Capricorne, being the most remote from us in his farthest South declination, causing the dayes with us to bee shortest and the nights longest: which Quarter continuing untill the Sunne hath slowly passed through Capricorne, Aquarius, and Pisces. This Quarter doth naturally resemble old age.

Of the Spring.

⊙ in ♈, ♉, ♊.

This Quarter doth take beginning the 10. of March, at what time the Sun entreth into the first minute of Aries, and doth continue whilst the Sun is passing through these 3. vernall signes, Aries, Taurus, and Gemini. This Quarter doth resemble growing youth.

Of Summer.

☉ in ♋, ♌, ♍.

THe Summer Quarter doth take his beginning when the Sunne doth enter into the first degree of Cancer, which will bee this yeere the 12. of June, and doth continue whilest the Sunne passeth through Cancer, Leo, Virgo, now are the dayes longest, and the ayre hottest, therefore, but for necessitie, bid Physicke Adieu.

Of Autumne.

☉ in ♎, ♏, ♐.

AUtumne or Harvest Quarter (commonly called the Fall of the leafe, of some the Latter Spring) doth begin when the Sunne doth enter into the first degree of Libra, making againe the day and the night of equall length: Which will be this yeere the 13. of September, and doth continue whilst the Sunne doth passe through Libra, Scorpio, and Sagittarius. This quarter doth fitly resemble declining age and Phlegmaticke complexion.

Since the yeere of the Worlds Creation.

A briefe Chronologicall Description of many things worthy of memory, that have happened since the Creation unto this present yeere of our Lord 1638. with the yeere of the World, in which they happened: in the first Columne faithfully collected from many good Authors.
